

# **GUIDE FOR APPLICANTS**

## **Marie Skłodowska-Curie Actions**

### **Innovative Training Networks (ITN)**

Call Identifier: H2020-MSCA-ITN-2015  
Closing Date: 13 January 2015 at 17:00:00  
(Brussels local time)

Date of publication: 2 September 2014  
Version Number: 2015.1

## **The Marie Skłodowska-Curie Actions in Horizon 2020**

The Marie Skłodowska-Curie Actions (MSCA) aim to support the career development and training of researchers – with a focus on innovation skills – in all scientific disciplines through international and intersector mobility.

The MSCA are expected to finance around 65,000 researchers between 2014 and 2020, including 25,000 doctoral candidates. The Actions will address several objectives of the Europe 2020 strategy, including the Innovation Union flagship initiative. This states that the EU will need at least one million new research jobs if it is to reach the target of spending 3% of EU GDP on research and development by 2020.

By funding excellent research and offering attractive working conditions, the MSCA offer high quality professional opportunities open to researchers of any age, nationality or discipline.

### **The 2015 Marie Skłodowska-Curie Actions are:**

- **Innovative Training Networks (ITN)**  
Innovative doctoral-level training providing a range of skills in order to maximise employability
- **Individual Fellowships (IF)**  
Support for experienced researchers undertaking mobility between countries, and also to the non-academic sector
- **Research and Innovation Staff Exchange (RISE)**  
International and intersectoral collaboration through the exchange of research and innovation staff
- **Co-funding of regional, national and international programmes (COFUND)**  
Co-financing high-quality fellowship or doctoral programmes with transnational mobility

The Coordination and Support Action **European Researchers' Night (NIGHT)**, funded under the MSCA, is a Europe-wide public event to stimulate interest in research careers, especially among young people.

Guides for Applicants for all of the MSCA can be found on the Participant Portal at: <http://ec.europa.eu/research/participants/portal>

The MSCA website can be found at:  
<http://ec.europa.eu/research/mariecurieactions/>

**This Guide is based on the rules and conditions contained in the legal documents relating to Horizon 2020 (in particular the Horizon 2020 Framework Programme and Specific Programme, the Rules for Participation, and the Work Programmes), all of which can be consulted via the Participant Portal.**

### **Definitions used throughout this Guide:**

**Early-Stage Researchers (ESRs)** shall, at the time of recruitment by the host organisation, be in the first four years (*full-time equivalent research experience*) of their research careers and have not been awarded a doctoral degree.

**Date of Recruitment** normally means the first day of the employment of the fellow for the purposes of the project (i.e. the starting date indicated in the employment contract or equivalent direct contract).

**Full-Time Equivalent Research Experience** is measured from the date when a researcher obtained the degree which would formally entitle him/her to embark on a doctorate, either in the country in which the degree was obtained or in the country in which the researcher is recruited or seconded, irrespective of whether or not a doctorate is or was ever envisaged.

**Mobility Rule:** at the time of recruitment by the host organisation, researchers must not have resided or carried out their main activity (work, studies, etc.) in the country of their host organisation for more than 12 months in the 3 years immediately prior to the reference date. Compulsory national service and/or short stays such as holidays are not taken into account. As far as international European interest organisations or international organisations are concerned, this rule does not apply to the hosting of eligible researchers. However, the appointed researcher must not have spent more than 12 months in the 3 years immediately prior to their recruitment at the host organisation.

**Academic Sector** consists of public or private higher education establishments awarding academic degrees, public or private non-profit research organisations whose primary mission is to pursue research, and international European interest organisations as they are defined in Article 2 of the Horizon 2020 Rules for Participation.

**Non-Academic Sector** includes any socio-economic actor not included in the academic sector and fulfilling the requirements of the Horizon 2020 Rules for Participation.

**Member States (MS)** are member states of the European Union.

**Associated Countries (AC)** are third countries that are associated to Horizon 2020.

**Non-Associated Third Countries (TC)** are countries which are neither EU Member States (MS) nor associated to Horizon 2020 (AC). Some TC are included in the list of countries eligible for funding, provided in the General Annex A to the Work Programme.

**Coordinator** is the beneficiary that is taking the lead in the preparation of the proposal as the "proposal coordinator". For a given proposal, the coordinator acts as the single point of contact between the participants and the Research Executive Agency (REA).

**Beneficiaries** are organisations that are full partners of a network and are signatories to the Grant Agreement. They contribute directly to the implementation of the research training programme by appointing, supervising, hosting and training researchers. They may also provide secondment opportunities. Beneficiaries take complete responsibility for executing the proposed programme and other requirements of the project.

**Partner Organisations** are not signatories to the Grant Agreement and do not employ the researchers within the project. Partner organisations provide additional training and/or host researchers during secondments.

**MSCA Work Programme:** Part 3 to the Horizon 2020 Work Programme 2014-2015 ("Marie Skłodowska-Curie Actions"), European Commission Decision C(2014)4995 of 22 July 2014. Applicants should also refer to the General Introduction and General Annexes.

**European Charter and Code for Researchers:** Commission Recommendation of 11 March 2005 on the European Charter for Researchers and on a Code of Conduct for the Recruitment of Researchers, C(2005)576 of 11 March 2005.

**NB: *Links to documents referred to in this Guide are provided on pages 22-23***

# Marie Skłodowska-Curie "Innovative Training Networks"

## 1. General Aspects

### 1.1. Purpose

The specific objectives of the Marie Skłodowska-Curie Innovative Training Networks (ITN) are<sup>1</sup>:

- to train a new generation of creative, entrepreneurial and innovative early-stage researchers able to face current and future challenges and to convert knowledge and ideas into products and services for economic and social benefit;
- to raise excellence and structure research and doctoral training, extending the traditional academic research training setting, and equipping researchers with the right combination of research-related and transferable competences. They will provide enhanced career perspectives in both the academic and non-academic sectors through international, interdisciplinary and intersectoral mobility combined with the innovation-oriented mind-set.

Institutions which are actively involved in research and (research) training (e.g. universities, public or private non-commercial research centres, large enterprises, SMEs, non-profit or charitable organisations, etc.) will propose a research training network and apply for funding. If selected they will cooperate to recruit researchers and provide them with opportunities to undertake research in the context of **a joint research training or doctoral programme**. These programmes should respond to well-identified multi- and inter-disciplinary needs in defined scientific or technological areas, **expose the researcher to the academic and non-academic sectors**, and offer a comprehensive set of **transferable skills** relevant for innovation and long-term employability (entrepreneurship, commercialisation of results, Intellectual Property Rights (IPR), communications etc.). Proposals should reflect existing or planned research cooperation among the partners in which the researchers will take part through **individual, personalised research projects**.

### 1.2 Structure

ITN project proposals may take one of three forms, each with different participation requirements:

1. European Training Networks (ETN)
2. European Industrial Doctorates (EID)
3. European Joint Doctorates (EJD)

#### ▪ European Training Networks (ETN)

The largest share of the ITN call budget is made available for ETN. These networks have the objective of training highly-skilled researchers and stimulating entrepreneurship, creativity and innovation in Europe. An ETN must be composed **of at least three beneficiaries established in at least three different MS or AC**.

<sup>1</sup> Please see also Principles for Innovative Doctoral Training ([http://ec.europa.eu/euraxess/pdf/research\\_policies/Principles\\_for\\_Innovative\\_Doctoral\\_Training.pdf](http://ec.europa.eu/euraxess/pdf/research_policies/Principles_for_Innovative_Doctoral_Training.pdf))

Above this minimum, the participation of other organisations, including international European interest organisations and those from TC, is possible under the conditions provided by the Horizon 2020 Rules for Participation (see more details below). There is no pre-defined size for these multi-partner networks. However, **it is recommended to keep the size of the consortium between 6 and 10 beneficiaries** since previous experience has shown this to be a manageable size.

Although not a formal eligibility requirement, it is expected that beneficiaries will be drawn from different sectors and that ETN proposals will offer intersectoral and interdisciplinary research training as well as high-quality supervision arrangements.

▪ **European Industrial Doctorates (EID)**

EID aims to meet the objectives of ITN in particular by involving the non-academic sector in doctoral training so that skills better match public and private sector needs. **An EID must be composed of at least two beneficiaries established in two different MS or AC. At least one beneficiary must be entitled to award doctoral degrees<sup>2</sup> and at least one beneficiary must come from the non-academic sector, preferably enterprise.** Additional beneficiaries and partner organisations can come from any country or sector.

Each recruited researcher must:

- be enrolled in a doctoral programme at one of the academic beneficiaries;
- be jointly supervised by at least two supervisors, one from each sector;
- spend at least 50% of their time in the non-academic sector (at beneficiaries or partner organisations). The specific percentage of time that each researcher will spend at each institution should therefore be indicated in the proposal.

The research conducted in each participating entity must be within the framework of the doctoral programme and should aim to support long-term, industry-oriented research (fundamental or applied).

*Example: an academic research institution in Germany, a university in Finland and a research-performing enterprise in Latvia propose an EID in the field of medical devices based on nanotechnology. The academic research institution in Germany cannot award doctoral degrees therefore the ESRs will be enrolled at the university in Finland. The researchers will spend 50% of their time at the enterprise in Latvia with their remaining time split between the research institution in Germany and the university in Finland. Training will be offered by all three beneficiaries, with short-term secondment opportunities and transferable skills training offered by a number of other partner organisations.*

EID proposals will be ranked in a separate panel with a dedicated budget of €25 million.

---

<sup>2</sup> References in this document to "doctoral degrees" mean degrees recognised as such by the relevant authorities of the country or countries concerned.

## ▪ **European Joint Doctorates (EJD)**

EJD has the objective of promoting international, intersectoral and multi/inter-disciplinary collaboration in doctoral-level training in Europe through the creation of joint doctoral programmes, leading to the **delivery of joint, double or multiple doctoral degrees**. An EJD must be composed of **at least three beneficiaries entitled to award doctoral degrees from three different MS or AC**. At least two institutions conferring a joint, double or multiple doctoral degree must be established in an MS or AC.

A **joint degree** refers to a single diploma issued by at least two higher education institutions offering an integrated programme and recognised officially in the countries where the degree-awarding institutions are located. A **double or multiple degree** refers to two or more separate national diplomas issued by two or more higher education institutions and recognised officially in the countries where the degree-awarding institutions are located.

**The joint supervision of fellows is mandatory**, as is the creation of **a joint governance structure** with joint admission, selection, supervision, monitoring and assessment procedures.

Each recruited researcher must be:

- selected, supervised, monitored and assessed through a joint governance structure;
- be enrolled on a joint doctoral programme;
- undertake transnational mobility (see [Definitions](#)).

The consortium should propose a coherent joint doctoral programme aiming at overcoming national, sectoral and inter-disciplinary boundaries in doctoral research, promoting the mobility of doctoral candidates, and leading to lasting doctoral-level cooperation between the beneficiaries. The joint doctoral programme should also contribute to reinforcing the links between universities/research organisations and the non-academic sector in order to strengthen the transmission and exploitation of knowledge and to enhance the innovation process. Proposals should provide for a coherent doctoral programme, clearly indicating those elements common for all researchers and those which will be tailored to the individual fellows. Proposals should also demonstrate how the joint programme will be embedded within existing doctoral and research training programmes, and should also include a tentative list of the individual research projects to be completed in the framework of the project.

The participating organisations must demonstrate clearly that the joint scheme will become a reference at European level, thus contributing to improving the overall quality of doctoral education and research in Europe, and will lead to the award of a joint, double or multiple degree recognised or accredited by the respective national authorities. As such, **letters of commitment must be included in Part B.7 of the proposal from each of the beneficiaries that would award the (joint, double or multiple) doctoral degrees** stating their agreement, in principle, to ensure the provision of such degrees should the proposal receive funding. **If successful, a copy or the final agreement** between the institutions **will be requested as a deliverable** soon after the start of the project.

Example: a consortium composed of academic institutions entitled to deliver doctoral degrees based in Italy, Luxembourg, Slovenia, France and Bulgaria propose an EJD in political science examining the rise of regional parties in Europe. Partner organisations in three other countries offer additional secondment opportunities and transferable skills training. Each recruited fellow will be supervised by experts from at least two different beneficiaries and will participate both in common, programme-wide training courses as well as specialised, tailored courses specific to their needs. Secondments will be targeted according to the expertise available at each of the beneficiaries and will be used to gather data and conduct expert interviews as well as to attend courses and training modules not available at other institutions. Skills training will include modules on qualitative and quantitative research methods, presentation skills, and consulting methodologies. The fellows' research will be recognised by two of the academic beneficiaries and will lead to the award of a joint doctoral degree.

EJD proposals will be ranked in a separate panel with a dedicated budget of €28 million.

**The overall EU contribution per grant agreement is limited to maximum of:**

- **540 person-months per network for all ETN and EJD projects, as well as for an EID with more than 2 beneficiaries;**
- **180 person-months per network for an EID with 2 beneficiaries.**

**The expert evaluators will carefully consider the requested number of person-months in the light of the coherence of the proposed project and the capacities of the hosts.**

## **2. Participants**

### **2.1 Beneficiaries**

Beneficiaries are organisations that are **full participants of a network**. They contribute directly to the implementation of the joint training programme of the network **by recruiting, supervising, hosting and training researchers**. They may also provide secondment opportunities. **Beneficiaries are signatories to the grant agreement**, receive funding, claim costs, and take complete responsibility for executing the proposed programme.

Regardless of their size, all beneficiaries must be able to physically host at their premises – and offer appropriate supervision of – the recruited researchers. The expert evaluators will therefore be asked to give an opinion on whether each beneficiary is able to offer a hosting environment commensurate with its role and involvement in the project. Should a beneficiary wish to host a researcher at premises other than at their registered address, e.g. a university sending the researcher to another campus or laboratory in another city, or a company sending the researcher to a branch in another country, this must be expressly stated and justified in the proposal.

## 2.2 Partner Organisations

Partner organisations complement the research training programme but **do not recruit any researchers**. They provide additional research and transferable skills training and/or secondment opportunities. Partner organisations can be academic or non-academic organisations, located in any country. **They are not signatories to the grant agreement.**

Partner organisations **cannot directly claim any costs from the project**. Instead, the beneficiaries would need to reimburse the partner organisations for their activities in the research training programme.

Each partner organisation must **include an up-to-date letter of commitment in Part B.7 of the proposal** to demonstrate their real and active participation in the proposed network. The expert evaluators will disregard the contribution of any partner organisation for which no letter of commitment is submitted. The precise role of each partner organisation should also be clearly described in the proposal. There is no pre-defined number of partner organisations in a project.

Both academic and non-academic organisations can take part in an ITN either as a beneficiary or as a partner organisation.

Minimum Number of Participants			
Network Status	ETN	EID	EJD
<b>Beneficiary</b>	3	2 1 doctoral-degree awarding; 1 non-academic	3 doctoral degree-awarding
<b>Partner Organisation<sup>3</sup></b>	No minimum	No minimum	No minimum

Summary of Tasks				
Network Status	Recruitment of Researchers	Training and/or Hosting of Seconded Researchers	Participation in Supervisory Board	Directly Claims Costs
<b>Beneficiary</b>	✓	✓	✓	✓
<b>Partner organisation</b>	x	✓	✓	x

## 2.3 Eligible Organisations

Before applying, each beneficiary has to register and is automatically classified in one of the two sectors (academic or non-academic) on the basis of the information

<sup>3</sup> It is recommended that the number of partner organisations is reasonable and commensurate with the size of the network.

provided during the legal validation process.<sup>4</sup> In the Rules for Participation some categories of organisations are defined (i.e. SME, IEIO, non-profit legal entity).

For the purposes of ITN, participating organisations can be divided into two sectors: academic and non-academic (see below).

## **2.4 Academic Sector**

For the definition of the academic sector see [Definitions](#).

## **2.5 Non-Academic Sector**

ITN aims to improve the employability of researchers through exposure to organisations in the academic and non-academic sectors, thereby broadening the traditional academic research training setting and eliminating cultural and other barriers to mobility. **An essential part of any ITN is therefore the involvement of organisations from different sectors.** For EID projects, note that the participation of the non-academic sector as a beneficiary is an eligibility criterion.

In all cases **the involvement of the non-academic sector must be meaningful and appropriate to the implementation mode and research field.** The quality and degree of involvement of organisations from the non-academic sector will be assessed by the expert evaluators according to the evaluation criteria.

The **non-academic sector** includes e.g. private enterprises (including SMEs), non-profit or charitable organisations (NGOs, trusts, foundations, etc.), museums, hospitals, international organisations (like UN or WHO), etc.

The status of an organisation is ultimately determined by the legal validation of the entity (PIC number).

Example: If an organisation has a “non-profit research organisation” status, it may be classified in the academic sector depending on its statute (e.g. in the case of some museums).

## **2.6 Eligible Country Groups and their Role in an ITN**

For the purposes of the ITN action three main categories of countries can be distinguished:

- EU Member States (MS)
- Associated Countries (AC)
- Non-Associated Third Countries (TC)

TC are neither EU Member States nor third countries associated to Horizon 2020 (Associated Countries), see definitions on p.4.

---

<sup>4</sup> Legal entities having a valid PIC number under FP7 maintain their PIC in H2020. The details of all validated organisations are stored in the Unique Registration Facility (URF). For the confirmation and, **if necessary, revision** of the data stored in the URF, the Commission asks each organisation to nominate a Legal Entity Appointed Representative (LEAR). The LEARs can view their organisations' legal and financial data online and ask for corrections and changes through the Participant Portal.

## Minimum Country Participation in an ITN

Implementation Mode	Country of beneficiaries
<b>European Training Network (ETN)</b>	<b>Minimum: 3 different countries:</b> MS or AC
<b>European Industrial Doctorates (EID)</b>	<b>Minimum: 2 different countries:</b> MS or AC
<b>European Joint Doctorates (EJD)</b>	<b>Minimum: 3 different countries:</b> MS or AC
Additional beneficiaries or partner organisations can be established anywhere in the world (MS, AC, TC)	

- **International European Interest Organisations (IEIO)**

An "International European Interest Organisation" is defined in Article 2.1(12) of the Horizon 2020 Rules for Participation as "an international organisation, the majority of whose members are Member States or Associated countries, and whose principal objective is to promote scientific and technological cooperation in Europe". As IEIO are not linked to any country, for the purpose of the programme they are considered as institutions established in a MS or AC other than those represented by the beneficiaries in the network. The same applies to the European Commission's Joint Research Centre. Examples of IEIO include CERN and EMBL. All members of EIROForum are considered European interest organisations.

*Example: European Molecular Biology Laboratory (EMBL) is a non-profit international European interest organisation specialising in basic research in the life sciences. The main EMBL laboratory situated in Heidelberg, Germany, will be eligible to participate in an ETN together with two other beneficiaries from Poland and Germany. Although it is physically located in Germany, it will not count as a German beneficiary and thus the minimum requirement for the participation of 3 institutions coming from 3 different MS/AC is fulfilled.*

- **Non-Associated Third Countries and International Organisations**

Above the minimum number of Member States and Associated Countries, legal entities established in TC are eligible to participate in an ITN.

The funding available for research teams based in TC will depend on the status of the country. For countries listed in General Annex A to the Horizon 2020 Work Programme, funding may be granted on the same terms as for EU Member States and Horizon 2020 Associated Countries, providing that the minimum participation requirements have been met.

In exceptional cases, an international organisation or an entity established in a country *not* listed in General Annex A to the Work Programme may be entitled to participate as a beneficiary. This must, however, be **endorsed by the expert evaluators** and at least one of the following conditions must be fulfilled:

- the participation is deemed essential for carrying out the action by the Commission or the relevant funding body;

- such funding is provided for under a bilateral scientific and technological agreement or any other arrangement between the Union and the international organisation or, for entities established in third countries, the country in which the legal entity is established.<sup>5</sup>

**Note:** In the context of the consortium's composition, applicants should take into account that for all ITN projects (except for EID), **no more than 40% of the total EU financial contribution** may be allocated for the benefit of organisations within one country.

### 3. Implementation of an ITN

#### 3.1 The Topic of the Project

All Marie Skłodowska-Curie actions have a **bottom-up approach**, i.e. proposals in all domains of research and technological development are eligible for funding, except for areas of research covered by the EURATOM Treaty. Applicants will be required to define in the proposal the scientific and technological area within which the individualised research projects of the recruited researchers will be developed.

All research activities supported by Horizon 2020 should respect fundamental ethical principles (see [Annex 5](#) of this Guide).

#### 3.2 Recruitment

##### European Training Networks (ETN)

- All beneficiaries must recruit and host at least 1 researcher

##### European Industrial Doctorates (EID) and European Joint Doctorates (EJD)

Two possibilities exist:

- Each researcher is employed 100% by a beneficiary and sent to other beneficiaries or partner organisations for the share of time foreseen under the implementation mode in question, or
- Each researcher is recruited separately by each beneficiary for the period of time they spend there.

For EID, however, recruited researchers must spend at least 50% of their time in the non-academic sector (at beneficiaries or partner organisations).

Note that the *mobility* requirement (see point 3.7 below) applies to the beneficiary where the researcher is recruited. If the researcher has a recruitment contract with more than one beneficiary, however, the *mobility* requirement will apply to the beneficiary where the researcher is recruited for the first time in the project.

The choice of recruitment option and location of the premises of the recruiting beneficiary will have an influence on the fellow's salary in view of the different country correction coefficients (see Table 4, p.52 and 53 of the MSCA Work Programme).

---

<sup>5</sup> A list of such agreements is available at: <http://ec.europa.eu/research/iscp/index.cfm?pg=countries>.

The project will be responsible for the selection and recruitment of its eligible researchers. An important aspect of the Commission's policy towards researchers is to improve their working and living conditions and to promote mobility in order to open up new perspectives for research careers within Europe. The Marie Skłodowska-Curie actions aim to act as a catalyst in this respect. The host organisations will therefore be required to meet certain conditions relating to the publishing of vacancies, recruitment and length of appointment of researchers and which should be in line with the principles set out in **the European Charter and Code for Researchers** (see [Definitions](#)). Note that a beneficiary may not recruit a researcher via an employment agency.

### **3.3 Eligible Researchers**

All researchers recruited in an ITN must be **Early-Stage Researchers** (ESRs) and undertake transnational mobility (see point 3.7 below). For all recruitments, the eligibility of the researcher will be determined at the time of their **first recruitment** in the project. The status of the researcher will not evolve over the life-time of the project, even if they are re-recruited at another beneficiary.

### **3.4 Conditions of Mobility of Researchers**

Researchers can be of **any nationality**. They are required to undertake transnational mobility (i.e. move from one country to another) when taking up their appointment (see mobility rule in [Definitions](#)).

Therefore, nationality is not a criterion. Rather the location of the researcher's residence or main activity during the 3 years prior to their recruitment is determining.

Example: German nationals can be eligible for recruitment at a beneficiary located in Germany as long as they have resided or carried out their main activity outside of Germany for more than 24 months in the 3 years immediately prior to their recruitment.

Note that the mobility rule applies to the (first) beneficiary **where the researcher is recruited**, and not to beneficiaries to which the researcher is sent or seconded. It is also **only determined at one point in time**: that of the fellow's first recruitment in the project.

### **3.5 Duration of the Project and of the Recruitments**

The duration of the project is limited to **48 months from the start date of the project**. The recruitment of each individual **ESR** will be supported for a **minimum of 3 months and up to a maximum of 36 months**. However, researchers enrolled in a doctoral programme are expected to be appointed for the maximum 36 months. Given the time required at the beginning of the project to advertise the vacancies and to recruit researchers, the 48 month duration of the project offers a sufficient margin to ensure that the researchers can remain in place for the full 36 month period.

### **3.6 The Supervisory Board**

Each project will have a clearly identified **Supervisory Board** co-ordinating the network-wide training activities.

### Composition

The Supervisory Board will be composed of representatives of all beneficiaries and partner organisations and may also include any other stakeholders of relevance to the training programme, including those from the non-academic sector. An appropriate gender balance should be respected in the board's composition. It is also considered best practice to include a representative from among the recruited ESRs.

### Tasks

The board will oversee the quality of the programme and ensure an adequate balance between scientific/technological and transferable skills training. This shall be achieved through personalised research projects and training, appropriate to the needs of each recruited researcher. Involvement of the non-academic sector in the supervisory board aims to ensure that the skills acquired by researchers fulfil the needs of both academia and the non-academic sector and enhance the intersectoral employability of the researchers. The Supervisory Board will also establish an active and continuous communication and exchange of best practice among the partners to maximise the benefits of the partnership. Finally, it will also oversee the quality and quantity of supervision of the *ESRs*.

### **3.7 Management and Consortium Agreement**

Participants in an ITN are strongly encouraged to draw up a **consortium agreement setting their cooperation in the project**. This agreement should cover the selection and recruitment procedures and principles, IPR, and the supervision arrangements, including qualifications of supervisors, etc.

The cooperation and communication within the project shall be as open and efficient as possible, with the appropriate involvement of recruited researchers (for the organisation of meetings and identification of training needs, for example).

Note that **for EID, a consortium agreement is a contractual obligation**. Should the proposal be successful, a copy of the agreement will be required before the start date of the project.

## **4. Typical Activities of an Innovative Training Network**

### **4.1 Research and Training Activities**

Applicants will primarily propose a dedicated and high-level joint research training programme that focuses on promoting scientific excellence and exploiting the specific research expertise and infrastructure of the beneficiaries and of the collective expertise of the network as a whole. These training programmes will address in particular the development and broadening of the research competences of the ESRs. Such training activities might include:

- **Training through research** by means of individual, personalised projects, including meaningful exposure to different sectors;
- **Development of network-wide training activities** (e.g. workshops, summer schools) that exploit the inter/multi-disciplinary and intersectoral aspects of the project and expose the researchers to different schools of thought. Such events could also be open to external researchers. For doctoral

programmes (i.e. EID and EJD), the broad structure of the curriculum should be outlined and preferably quantifiable by ECTS points;

- **Provision of structured training courses** (e.g. tutorials, lectures) that are available either locally or at another participant. Training programmes between the participants are expected to be coordinated to maximise added value (e.g. joint syllabus development, opening up of local training to other network teams, joint PhD programmes, etc.);
- **Exchanging knowledge with the members of the network** through undertaking intersectoral visits and secondments. A strong networking component is expected in each proposal;
- **Invitation of visiting researchers** originating from the academic or non-academic sector. This would be aimed at improving the skills and know-how of the researchers and should be duly justified in the context of the training programme. The network can cover costs of visiting researchers under the Research, Training and Networking cost category.

Further training activities with a particular view to widening the career prospects of the researchers would include **transferable skills training** both within and outside the network. Topics of interest could include:

- Training related to research and innovation: management of IPR, take up and exploitation of research results, communication, standardisation, ethics, scientific writing, personal development, team skills, multicultural awareness, gender issues, research integrity, etc.
- Training related to management or grant searching: involvement in the organisation of network activities, entrepreneurship, management, proposal writing, enterprise start-up, task co-ordination, etc.

Each researcher recruited for a period of more than 6 months will establish, together with her/his personal supervisor(s) in the host organisation/s, **a personal Career Development Plan**. This plan shall aid in the provision of the research training programme that best suits the researcher's needs. Attention should be paid to the quality of the joint research training programme, with provision for supervision and mentoring arrangements and career guidance. Furthermore, the **meaningful exposure of each researcher to other disciplines and sectors** represented in the network through visits, secondments and other training events shall also be ensured.

Although mutual recognition is mandatory only for EJD, it is expected that both beneficiaries and partner organisations will **mutually recognise the quality of the research and training** and, if possible, of diplomas and other certificates awarded. The size of the joint research training programme and of the network will depend on the nature and scope of the training activities to be undertaken by the network, as well as on considerations regarding management and effective interaction among the partners.

## 4.2 Secondments

**In all ITN modes**, recruited researchers can be seconded to other beneficiaries and/or to partner organisations for **a duration of up to 30% of their recruitment period**. Normal practice during secondments is for the researchers to keep their contract with the sending institution, which also pays their travel and subsistence expenses (e.g. accommodation). During their secondment, researchers receive

supervision and training at the premises of the receiving beneficiary or partner organisation. Secondments should be differentiated from short visits, i.e. of a few days or weeks.

*Example: an ESR recruited in an ETN for a period of 36 months by an astrophysics institute in Spain will spend two periods of secondment each of 5 months at two partner organisations from the private sector in order to profit from specific training facilities, one located in South America and another one in Portugal. The institute in Spain will continue paying the researcher's allowances during the entire recruitment period, including the secondments.*

**In EID**, all recruited ESRs must spend at least 50% of their time in the non-academic sector. Therefore if a researcher is recruited by an academic beneficiary, they must be sent to the non-academic sector, preferably enterprise, for at least 50% of their recruitment period within the project. Above this requirement, the 30% secondment rule applies. It is expected that the recruited researchers will benefit from the strong research collaboration of the beneficiaries (academic and non-academic). The provision of additional training by partner organisations is encouraged, where relevant.

**In EJD** it is expected that the researchers will need to spend at least the minimum period of time at the corresponding academic beneficiary(ies) required to be eligible to submit a doctoral degree there. This will vary according to the institution and country in question. Additional secondments (including to non-academic partners), may also take place as appropriate, up to 30% of the recruitment period.

### **Secondments**

Secondments are encouraged but must not exceed 30% of an ESR's appointment period. The 30% rule applies to short secondments from the hosting beneficiary to other beneficiaries or partner organisations. In EID and EJD the 30% rule applies to short secondments above the mandatory requirements of the implementation mode.

### **4.3 Networking Activities**

Networks will establish or strengthen the collaboration between the research teams, as well as between themselves and the wider scientific community.

Each network will be expected to organise workshops, seminars, summer schools, etc. which should be directly related to the research training programme of the network. The content and quality of such events should be detailed and fully justified in the proposal.

Networking activities could further include:

- Organisation of scientific or managerial network meetings;
- Visits and secondments between partners in order to exchange knowledge;
- Invitation of external experts for specialist input;
- Attendance of the recruited researchers at international conferences and workshops;
- Use of the Internet, email and video conferencing;
- Collaboration with other ITN project or research group;
- Organisation of a final network conference.

Training events offered within the network may also be opened to external researchers.

#### 4.4 Communication and Dissemination

In addition to publications and patents, communication of the Marie Skłodowska-Curie actions should aim to demonstrate the ways in which research is contributing to a European "Innovation Union"<sup>6</sup>. It should also account for public spending by providing tangible evidence that the funded research adds value by:

- showing how **European collaboration** in the ITN has achieved more than would have otherwise been possible, notably in achieving scientific excellence, contributing to competitiveness and, where relevant, solving societal challenges;
- showing how the outcomes are **relevant to our everyday lives**, by creating jobs, training skilled researchers, introducing novel technologies, or making our lives more comfortable in other ways;
- **promoting results**, which may possibly influence policy-making or ensure follow-up by industry and the scientific community.

#### Open Access under Horizon 2020

Following Horizon 2020's open access policy, beneficiaries must ensure that peer-reviewed scientific publications resulting from ITN funding are deposited in open access repositories, i.e. free of charge online access for the user. A repository number for each publication must be provided in project reports.

Horizon 2020 also includes a pilot on Open Research Data. The main goal of the pilot is to facilitate research data registration, discovery, access and re-use, in particular in the context of Horizon 2020 funded projects. There is no obligation on ITN projects to participate in the pilot. However, should the beneficiaries choose to do so, a data management plan will be required in the proposal (under "Implementation").

Further information on the Data Management Plan and the pilot can be found in the documents section of the Participant Portal. During the submission process, applicants will be asked to specify whether they wish to participate in the Open Research Data pilot.

#### 4.5 Public Engagement

In the Marie Skłodowska-Curie Actions (MSCA), the primary goal of public engagement activities is to **create awareness among the general public of the research work performed and its implications for citizens and society**. The type of outreach activities could range from press articles and participating in European Researchers' Night events to presenting science, research and innovation activities to students from primary and secondary schools or universities in order to develop their interest in research careers. **The frequency and nature of such activities should be outlined in the proposal.**

---

<sup>6</sup> [http://ec.europa.eu/research/innovation-union/index\\_en.cfm](http://ec.europa.eu/research/innovation-union/index_en.cfm)

## 5. Financial Aspects

The financial support for ITN projects is calculated on the basis of eligible person-months and takes the form of grants covering up to 100% of the costs. Funding is exclusively in the form of **unit costs**.

Unit costs are fixed amounts and apply to all categories of eligible costs. They are measured by the number of months which are implemented by the eligible researchers in the project. The unit costs are determined ex-ante in the Work Programme, specified in Annex 2 of the Grant Agreement, and cannot be modified. The grant reimburses 100% of the project's eligible unit costs.

The details of the European Union contribution and rates under this action are set out in MSCA Work Programme. There are two types of unit costs:

- Researcher unit costs;
- Institutional unit costs.

One unit is defined as work of one researcher in the project for a period of one month.

### **Researcher Unit Costs**

#### **5.1 Monthly Living Allowance**

This refers to the **basic, gross amount** for the benefit of the researcher to be paid to the researcher in monthly instalments. For MSCA calls launched in 2014-2015, the amount for an ESR is **€3,110 per month**.

This amount is then adjusted through the application of a **correction coefficient** to the living allowance of the country in which the researcher will be recruited. The final amount will not change in case of secondments to another beneficiary or partner organisation. The country correction coefficients are indicated in Table 4 in the MSCA Work Programme.

The host organisation must appoint each eligible researcher under an **employment contract**. Fixed amount fellowships are only permitted where national regulation prohibits the possibility of an employment contract, and only with the prior approval of the Research Executive Agency. The rates applicable in these cases will be 50% of the rates for researchers under an employment contract.

In all cases, the hosts must ensure that the researcher is covered under the **social security scheme** which is applied to employed workers within the country of the beneficiary, or under a social security scheme providing at least sickness and maternity benefits in kind, invalidity and accidents at work and occupational diseases, and covering the researcher in every place of implementation of the ITN activities.

In the case of **secondments** to other beneficiaries or partner organisations, the social security provision should also cover the researchers during these periods.

### **Important notice: Living allowance**

*NOTE: The living allowance is a **gross EU contribution** to the salary costs of the researcher. Consequently, the net salary results from deducting all compulsory (employer/employee) social security contributions as well as direct taxes (e.g. income tax) from the gross amounts. The host beneficiary **may pay a top-up** to the eligible researchers from another budget source in order to complement this contribution.*

*The rate indicated above is for researchers devoting themselves to their project on a full-time basis.*

## **5.2 Mobility Allowance**

All eligible researchers recruited within an ITN are entitled to receive this allowance. It contributes to the expenses of the researcher caused by the mobility. The amount of the mobility allowance is specified in Table 3 of the MSCA Work Programme and for the calls 2014-2015 it amounts to **€600 per month**.

## **5.3 Family Allowance**

A family allowance of **€500 per month** will be paid should the researcher have family, regardless of whether the family will move with the researcher or not. In this context, family is defined as persons linked to the researcher by (i) marriage, or (ii) a relationship with equivalent status to a marriage recognised by the national or relevant regional legislation of the country where this relationship was formalised; or (iii) dependent children who are actually being maintained by the researcher.

The family status of a researcher will be determined at the time of their (first) recruitment in the project and will not evolve during the project lifetime.

**The mobility and family allowances are fixed amounts**, regardless of the country of recruitment, and shall be excluded from taxation, where this is in line with national legislation.

The full amount of these allowances, minus compulsory deductions, should be paid to the researcher for their own use. Therefore no flights or accommodation related to the activities in the project (e.g. conferences) can be charged under this category.

## **Institutional Unit Costs**

### **5.4 Research, Training and Network Costs**

Research, Training and Network Costs are a unit cost of **€1,800 per person-month** managed by the host beneficiaries to contribute to expenses related to, for example:

- the participation of researchers in training activities;
- expenses related to research costs;
- execution of the project;
- contribution to the expenses related to the coordination between participants;
- costs for visiting researchers;
- tuition fees (where applicable).

## **5.5 Management and Overheads**

Management and Overheads refers to a unit cost of **€1,200 per person-month** that is to be used towards the management of the project. This may later on be re-distributed among the consortium. For example, the consortium may agree that all beneficiaries will contribute to the costs that the coordinator incurs for the management of the whole project. However, this is left to consortium to decide.

## **5.6 Budget Calculations**

**Applicants are not required to indicate the amount of the estimated EU contribution in their proposal.** This will be automatically calculated based on the number of person-months indicated in Part A of the proposal using the rates, allowances and coefficients given in Table 4 of the MSCA Work Programme.

**It is crucial that the information given in Part A is identical to the information given in proposal Part B.**

It is an essential feature of ITN that the expenses related to the appointment of researchers cannot be accurately calculated in advance. This is because the family allowance depends upon the personal circumstances of the researcher (i.e. family status). Therefore **an average calculation** will be used by the REA to determine the level of funding.

## **5.7 Research costs at premises other than those of the beneficiary**

In an ITN, a beneficiary has to recruit the researcher that will spend their time at the premises of this beneficiary. However, in certain situations it may be allowed for the research training activities to be performed at premises other than those of the beneficiary (e.g. in case of a joint research unit (e.g. *Unité Mixte de Recherche* in France) at a university hospital, or a subsidiary in a holding). This, however, needs to be clearly indicated and justified in the proposal. Nevertheless, in such situations, the recruiting beneficiary remains fully responsible for the implementation of the project, for ensuring the eligibility of the researcher, etc.

## **5.8 Contractual Obligations**

Complete details regarding contractual obligations that bind all beneficiaries can be found in the MSCA Work Programme and in the model Grant Agreement available on the Participant Portal.

## Key Points

**Applicants must apply to one of the three implementation modes:**

### 1. European Training Networks (ETN)

#### Composition of the Network

- Minimum participation of 3 beneficiaries from 3 EU MS or AC. Additional beneficiaries or partner organisations from any country. Typical size of 6-10 beneficiaries
- Participation of the non-academic sector is expected

#### Recruitments and Secondments

- Maximum of 540 person-months per network
- All beneficiaries must recruit and host eligible researchers
- Secondments of an individual researcher to other beneficiaries and/or partner organisations up to a maximum of 30% of their recruitment period

#### Remark

- Researchers will typically be enrolled in a doctoral programme

### 2. European Industrial Doctorates (EID)

#### Composition of the Network

- At least 2 beneficiaries, 1 academic (entitled to award doctoral degrees) and 1 non-academic (preferably enterprise), located in different MS or AC. Additional beneficiaries or partner organisations from any country. Typical size of 2-3 beneficiaries

#### Recruitments and Secondments

- Maximum 540 person-months per network, except for an EID with 2 beneficiaries (max. of 180 person-months)
- Researchers must spend at least 50% of their time in the non-academic sector. Above this requirement, short secondments to other beneficiaries/partner organisations up to a maximum of 30% of the recruitment period

#### Requirements

- Mandatory enrolment of researchers in a doctoral programme provided by a beneficiary
- Mandatory consortium agreement

#### Remark

- Ranked in a separate panel with an earmarked budget of €25 million

### 3. European Joint Doctorates (EJD)

#### Composition of the Network

- Minimum of 3 beneficiaries, located in different MS or AC, which are entitled to award doctoral degrees. Additional beneficiaries or partner organisations from any country. Typical size of 4-8 beneficiaries

#### Recruitments and Secondments

- Maximum of 540 person-months per network
- Short secondments of an individual researcher to other beneficiaries and/or partner organisations up to a maximum of 30% of that researcher's recruitment period, above the requirements of the joint doctoral programme

#### Requirements

- Mandatory enrolment of researchers in the joint doctoral programme

#### Remark

- Ranked in a separate panel with an earmarked budget of €28 million

### **General remarks:**

- ITN projects fund exclusively Early-Stage Researchers (ESR).
- ESR recruitment is for a minimum period of 3 months and a maximum of 36 months
- Transnational mobility requirement applies to all projects
- All projects have maximal duration of 48 months
- Participation as beneficiaries open to TCs listed in General Annex A of the Work Programme
- Maximum 40% of total budget to one country (except under EID)

## Annex 1 – Timetable and Specific Information for this Call

**The MSCA Work Programme** provides the legal details for submitting a proposal to this call. It describes the content of the topics to be addressed and details on how the call will be implemented. The Work Programme is available on the Participant Portal call page. Basic data on implementation (deadline, budget, additional conditions etc.) is also posted as a separate document ("call fiche"). Please consult these documents.

### Indicative timetable for this call

Publication of call	<i>02 September 2014</i>
Deadline for submission of proposals	<i>13 January 2015 at 17:00:00, Brussels local time</i>
Evaluation of proposals	<i>March 2015</i>
Information on the outcome of the evaluation	<i>June 2015</i>
Indicative date for the signing of grant agreements	<i>September 2015</i>

- **2015 indicative call budget:** € 370.00 million.

Of this amount, €25 million is allocated to EID and €28 million to EJD.

- **Further information and help**

The Participant Portal call page contains links to other sources that applicants may find useful in preparing and submitting a proposal. Direct links are also given where applicable.

## Annex 2 – Evaluation Criteria and Procedures

### 1. **General**

The evaluation of proposals is carried out by the Research Executive Agency (REA) with the assistance of independent experts.

REA staff ensure that the process is fair and in line with the principles contained in the Commission's rules.<sup>7</sup>

Experts perform evaluations on a personal basis, not as representatives of their employer, their country or any other entity. They are required to be independent, impartial and objective, and to behave throughout in a professional manner. They sign an expert contract, including a declaration of confidentiality and absence of conflict of interest, before beginning their work. Confidentiality rules must be adhered to at all times before, during and after the evaluation.

In addition, an independent expert will be appointed by the REA to observe and report on the evaluation process. The observer gives independent advice to the REA on the conduct and fairness of the evaluation sessions, on the way in which the experts apply the evaluation criteria, and on ways in which the procedures could be improved. The observer will not express views on the proposals under examination or on the experts' opinions on the proposals.

Proposals are submitted in a single stage and evaluated in one step by the experts against all evaluation criteria.

Conflicts of interest: under the terms of the expert contract, all experts must declare beforehand any known conflicts of interest, and must immediately inform the responsible REA staff member should one become apparent during the course of the evaluation. The REA will take whatever action is necessary to remove any conflict of interest.

Confidentiality: the expert contract also requires experts to maintain strict confidentiality with respect to the whole evaluation process. They must follow any instruction given by the REA to ensure this. Under no circumstance may an expert attempt to contact an applicant on his/her own account, either during the evaluation or afterwards.

### 2. **Before the Evaluation**

Once received in the Participant Portal's electronic submission system, proposals are registered and their status can be checked. Admissibility and eligibility criteria for each proposal are checked by REA staff before the evaluation begins. Proposals which do not fulfil these criteria will not be included in the evaluation.

For this call a proposal will only be considered eligible if it meets all of the following conditions:

- It is received by the REA **before the deadline** given in the call fiche;

---

<sup>7</sup> Horizon 2020 Guidelines for submission of proposals, and the related evaluation, selection and award procedures.

- It involves at least the **minimum number, country** and, where applicable, **sector of beneficiaries** as indicated in the call fiche, according to the mode (i.e. ETN, EID or EJD);
- It is **complete** (i.e. the requested administrative forms in Part A and the proposal description in Part B are both present);
- The content of the proposal **relates to the funding scheme**, including any special conditions set out in the relevant parts of the MSCA Work Programme.

<b>ITN - Marie Skłodowska-Curie Innovative Training Networks</b>		
<b>Excellence</b>	<b>Impact</b>	<b>Implementation</b>
<b>Quality, innovative aspects and credibility of the research programme</b> (including inter/multidisciplinary and intersectoral aspects)	<b>Enhancing research- and innovation-related human resources, skills, and working conditions to realise the potential of individuals and to provide new career perspectives</b>	<b>Overall coherence and effectiveness of the work plan</b> , including appropriateness of the allocation of tasks and resources (including awarding of the doctoral degrees for <i>EID</i> and <i>EJD</i> projects)
<b>Quality and innovative aspects of the training programme</b> (including transferable skills, inter/multidisciplinary and intersectoral aspects)	<b>Contribution to structuring doctoral / early-stage research training at the European level and to strengthening European innovation capacity, including the potential for:</b> <b>a)</b> meaningful contribution of the non-academic sector to the doctoral/research training, as appropriate to the implementation mode and research field <b>b)</b> developing sustainable joint doctoral degree structures (for <i>EJD</i> projects only)	<b>Appropriateness of the management structures and procedures</b> , including quality management and risk management (with a mandatory joint governing structure for <i>EID</i> and <i>EJD</i> projects)
<b>Quality of the supervision</b> (including mandatory joint supervision for <i>EID</i> and <i>EJD</i> projects)		<b>Appropriateness of the infrastructure of the participating organisations</b>
<b>Quality of the proposed interaction between the participating organisations</b>	Effectiveness of the proposed measures for <b>communication</b> and <b>dissemination of results</b>	<b>Competences, experience and complementarity of the participating organisations and their commitment to the programme</b>
<b>50%</b>	<b>30%</b>	<b>20%</b>
<b>Weighting</b>		
<b>1</b>	<b>2</b>	<b>3</b>
<b>Priority in case of <i>ex aequo</i></b>		
<b>Please note that an overall threshold of 70% will be applied to the total weighted score.</b>		

*A maximum length of 30 pages is applicable to sections 1-3 of Part B of the proposal. Applicants must keep these sections of the proposal within this limit. Experts will be instructed to disregard any excess pages.*

### **3. Evaluation of Proposals**

Each proposal will be assessed independently by at least three experts chosen by the REA from the pool of experts taking part in this evaluation. An expert will be designated as the proposal "rapporteur" and will assume additional responsibilities at the end of this phase and in the following phases of the evaluation session.

The proposal will be evaluated against the pre-determined evaluation criteria, applying weighting factors and thresholds.

Evaluation scores will be awarded for each of the three criteria. All of the separate elements of each criterion will be considered by the experts in their assessment.

Each criterion will be scored out of 5. Decimal points will be given.

The scores indicate the following with respect to the criterion under examination:

- |   |
|---|
| <p>0 - <i>Proposal fails to address the criterion or cannot be assessed due to missing or incomplete information.</i></p> <p>1 - <b>Poor.</b> <i>The criterion is inadequately addressed, or there are serious inherent weaknesses.</i></p> <p>2 - <b>Fair.</b> <i>Proposal broadly addresses the criterion, but there are significant weaknesses.</i></p> <p>3 - <b>Good.</b> <i>Proposal addresses the criterion well, but a number of shortcomings are present.</i></p> <p>4 - <b>Very Good.</b> <i>Proposal addresses the criterion very well, but a small number of shortcomings are present.</i></p> <p>5 - <b>Excellent.</b> <i>Proposal successfully addresses all relevant aspects of the criterion. Any shortcomings are minor.</i></p> |
|---|

An example of the evaluation forms that will be used by the experts in this call will be made available on the Participant Portal.

### **4. Operational Capacity**

The expert evaluators will also be asked to assess whether each beneficiary in the proposed consortium has the operational capacity required to participate in the project according to their planned role and responsibilities, as outlined in the proposal.

## **Annex 3 – Instructions for Completing Part A of the Proposal**

Proposals in this call must be submitted electronically, using the **Electronic Submission Service** of the Commission. It is accessible from the call page on the Participant Portal.

In Part A applicants will be asked for certain administrative details that will be used in the evaluation and further processing of their proposal. Part A constitutes an integral part of the proposal. Details of the work intended to be carried out will be described in Part B (see [Annex 4](#) and [Annex 5](#) of this guide).

The Electronic Submission Service provides guidance on how to complete the Part A, which includes the following sections:

- Section 1: General information about the proposal;
- Section 2: Data on participating organisations;
- Section 3: Budget (request for funding in terms of person-months);
- Section 4: Ethics table;
- Section 5: Information on partner organisations.

### **1. The Concept of Panels**

All eligible proposals will be evaluated under eight major areas of research (known as scientific "**panels**"): Chemistry (CHE); Social Sciences and Humanities (SOC); Economic Sciences (ECO), Information Science and Engineering (ENG); Environmental and Geo-Sciences (ENV); Life Sciences (LIF); Mathematics (MAT), and Physics (PHY). Experts will evaluate proposals under a given panel regardless of the form of proposal (i.e. ETN, EID or EJD). EID and EJD proposals will then be ranked in separate, multidisciplinary panels, each with its own earmarked budget (€25 million for EID and €28 million for EJD).

In the Electronic Submission Service, the applicant chooses the panel to which the proposal will be associated at the proposal stage (using the field "Scientific Panel" in section 1 of the proposal submission forms) and this should be considered as the core discipline. Additional descriptors are used to define the other disciplines that may be involved.

**Applicants should carefully choose the panel and descriptors since this will guide the REA in the selection of experts for proposal evaluation.**

Except for EID and EJD, as noted above, there is no predefined budget allocation among the panels: as a general rule the call budget will be distributed between the panels based on the proportion of eligible proposals received in each panel.

To help applicants select the most relevant panel for their proposal a document providing a **breakdown of each research area into a number of descriptors** will be provided on the call page on the Participant Portal.

## **2. How to Complete the Part A Forms**

### **• Coordinator**

The *coordinator* fills in the sections 1 (general information), 3 (budget), 4 (ethics) and 5 (data on partner organisations). **Numbers and information listed in section 3 (budget) should be the same as those reported in Part B of the proposal. In case of discrepancy, values from the Part A will be deemed to prevail.**

### **• Beneficiaries**

All beneficiaries (including the coordinator) complete section 2 corresponding to their respective organisation.

### **• Partner Organisations**

Information on partner organisations is provided by the coordinator **ONLY under section A5** of the proposal. Although not mandatory, providing a Participant Identification Code (PIC) for partner organisations in Section A5 is encouraged.

When completing part A, please make sure that **numbers are always rounded** to the nearest whole number.

NOTE: In cases where partner organisations propose to **fund their own participation** in the project (e.g. because they are located in a TC not eligible for funding), these person-months should not be requested in Part A of the proposal, but instead be indicated clearly in Part B of the proposal. A clear explanation of this set-up and of the use of own resources should therefore be provided in Part B.

## **3. Budget**

When applicants enter the number of recruited researchers and the length of their recruitment, **the system will automatically calculate an indicative project budget** based on the number of person months.

**Please enter the data for the budget carefully!** The expert evaluators will not comment on the budget but will evaluate the task distribution (e.g. appropriateness of the recruitment plan) under the *Implementation* criterion. No further adjustments will be possible.

## **Annex 4 – Instructions for Drafting Part B of the Proposal**

### **1. General Information**

Part B of the proposal contains the details of the proposed research and training programmes along with the practical arrangements planned to implement them. They will be used by the independent experts to undertake their assessment. We would therefore advise applicants to address each of the award criteria as outlined in the following sections, using both descriptive text and the tables provided. Please note that the explanatory notes below serve to explain the evaluation criteria without being exhaustive. To draft a proposal, applicants should also consult the current version of the MSCA Work Programme.

Applicants must structure their proposal according to the headings indicated in the Part B proposal template.

Please note that this call will be a single-stage proposal submission and evaluation procedure. **An RTF (rich text format) version** of the submission template can be downloaded from the Electronic Submission Service. Applicants must ensure that their proposals conform to this layout and to the instructions given in this Guide for Applicants.

The **maximum total length of sections 1 to 3 of Part B of the proposal is 30 pages**, as indicated in the proposal template.

There is no page limit per section. Within the overall page limit, applicants are therefore free to decide on the number of pages dedicated to each section.

Please remember that it is the applicants' responsibility to conform to the page limits. **Experts will be instructed to disregard any excess pages above the 30 page limit.**

The **minimum font size** allowed for the main text is **11** points. The page size is A4, and all **margins** (top, bottom, left, right) should be at least **15 mm** (not including any footers or headers). Ensure that the font chosen is clearly readable (e.g. Arial or Times New Roman). As an indication, such a layout should lead to a maximum of between 5,000 and 6,000 possible characters per page (including spaces).

For the Gantt chart and tables, the font size chosen must be clearly legible by the expert evaluators. The minimum font size is therefore 8 points. **Literature references should be listed in footnotes**, font size 8. All footnotes will count towards the page limit.

Please make sure that Part B of the proposal carries as a **header to each page** the proposal acronym and the implementation mode applied to (i.e. ETN, EID or EJD). All **pages should also be numbered** in a single series on the footer of the page to prevent errors during handling. It is recommended to apply the following numbering format: "**Part B - Page X of Y**".

## **2. Letters of Commitment**

**Partner organisations** must include a **letter of commitment** in the proposal to demonstrate their real and active participation in the proposed network. Such letters should be scanned and included in Section B.6. The experts will be instructed to disregard the contribution of any partner organisations for which no such evidence of commitment is submitted.

**Applicants to EJD** must also include scanned **letters of institutional commitment to award joint, double or multiple doctoral degrees** within the context of the proposed project. These letters should be signed by the organisation's legal representative, or someone of equivalent authority. They should also indicate agreement with the principle that the awarding of such degrees is a precondition for funding.

Please ensure that the proposal is complete. The **final version of Part B must include the letters of commitment** from partner organisations and doctoral degree awarding beneficiaries for EJD, as applicable.

For the proposal Part B, applicants must use exclusively PDF ("Portable Document Format", compatible with Adobe version 3 or higher, with embedded fonts). Other file formats will not be accepted by the Electronic Submission Services of the Commission. Letters of commitment must be included in the PDF file; these should not be attached in a separate PDF file or as an embedded file since this makes them invisible.

## **3. Gender Issues**

Marie Skłodowska-Curie actions pay particular attention to gender balance. In line with the European Charter and Code for Researchers, all MSCA proposals are encouraged to take appropriate measures to facilitate mobility and counter-act gender-related barriers to it. Equal opportunities are to be ensured, both at the **level of supported researchers** and that of **decision-making/supervision**. In research activities where human beings are involved as subjects or end-users, gender differences may exist. In these cases the **gender dimension in the research content has to be addressed as an integral part of the proposal** to ensure the highest level of scientific quality.

As training researchers on gender issues serves the policy objectives of Horizon 2020 and is necessary for the implementation of research and innovation actions, applicants are encouraged to include such activity in their proposals, as appropriate.

## **4. Scientific Misconduct**

Please note that **the issue of scientific misconduct is taken very seriously**. In line with the Horizon 2020 Rules for Participation, appropriate action will be taken against any applicants found to have misrepresented, fabricated or plagiarised any part of their proposal. Coordinators will also be required to make a "declaration on honour" in Part A of the proposal.

It is also expected that the management of scientific misconduct will be addressed in the proposal. For example, applicants are encouraged to describe

clear procedures for dealing with cases of misconduct (e.g. data fabrication, falsification, plagiarism, misuse of funds, double-funding, etc.) should they arise during project implementation.

## **Annex 5 – Part B Template**

Call: H2020-MSCA-ITN-2015**

PART B

“PROPOSAL ACRONYM”

**This proposal is to be evaluated as:**

**[ETN] [EID] [EJD]  
[delete as appropriate]**

Part B - Page X of Y

## TABLE OF CONTENTS

In drafting PART B of the proposal, applicants must follow the structure outlined below.

### START PAGE

### LIST OF PARTICIPANTS

---

### START PAGE COUNT

1. EXCELLENCE
2. IMPACT
3. IMPLEMENTATION

---

### STOP PAGE COUNT

4. GANTT CHART
5. CAPACITIES OF THE PARTICIPATING ORGANISATIONS
6. ETHICAL ISSUES
7. LETTERS OF COMMITMENT

#### Please note that:

- Applicants must ensure that sections 1-3 do not exceed the limit of 30 pages. The expert evaluators will be strictly instructed to disregard any content above this limit.
- No reference to the outcome of previous evaluations of this or any similar proposal should be included in the text. The expert evaluators will be strictly instructed to disregard any such references.

## LIST OF PARTICIPANTS

Please provide a list of the consortium's participants (both beneficiaries and partner organisations) indicating the legal entity, the department carrying out the work and the scientist-in-charge of the project.

For non-academic beneficiaries, please provide additional data as indicated in the table below.

Consortium Member	Legal Entity Short Name	Academic (tick)	Non-academic (tick)	Awards Doctoral Degrees (tick)	Country	Dept./ Division / Laboratory	Scientist-in-Charge	Role of Partner Organisation <sup>8</sup>
<u>Beneficiaries</u>								
- NAME								
<u>Partner Organisations</u>								
- NAME								

### Data for non-academic beneficiaries:

Name	Location of research premises (city / country)	Type of R&D activities	No. of full-time employees	No. of employees in R&D	Web site	Annual turnover <sup>9</sup> (in Euro)	Enterprise status (Yes/No)	SME status <sup>10</sup> (Yes/No)

### Note that:

- Any inter-relationship between different participating institutions or individuals (e.g. family ties, shared premises or facilities, joint ownership, financial interest, overlapping staff or directors, etc.) **must** be declared and justified **in this part of the proposal**;
- The information in the table for non-academic beneficiaries **must be based on current data, not projections**;
- The data provided relating to the capacity of the participating institutions will be subject to verification during the grant preparation phase.

<sup>8</sup> For example, delivering specialised training courses, hosting secondments, etc.

<sup>9</sup> Defined as the total value of sales of goods and services during the last accounting period.

<sup>10</sup> As defined in [Commission Recommendation 2003/361/EC](#)

## 1. Excellence

### 1.1 *Quality, innovative aspects and credibility of the research programme (including inter/multidisciplinary and intersectoral aspects)*

Required sub-headings:

- Introduction, objectives and overview of the research programme. For ETN projects, it should be explained how the individual projects of the recruited researchers will be integrated into – and contribute to – the overall research programme. EJD and EID projects should describe the research projects in the context of a doctoral training programme
- Research methodology and approach
- Originality and innovative aspects of the research programme (in light of the current state of the art and existing programmes / networks / doctoral research trainings)

The project should be divided in **Work Packages** and described in the table below. The Work Packages should reflect the research objectives. Only brief headings and overviews of the Work Packages should be presented in Table 1.1. More details in terms of actual implementation should be provided in the tables under section 3.1.

**Table 1.1: Work Package<sup>11</sup> (WP) List**

WP No.	WP Title	Lead Beneficiary No.	Start Month	End month	Activity Type <sup>12</sup>	Lead Participant Short Name	ESR involvement <sup>13</sup>

### 1.2 *Quality and innovative aspects of the training programme*

Required sub-headings:

- Overview and content structure of the training (ETN) or doctoral programme (EID/EJD), including network-wide training events and complementarity with those programmes offered locally at the participating institutions (please include table 1.2a and table 1.2b)
- Role of non-academic sector in the training programme

<sup>11</sup> A work package is defined as a major subdivision of the proposed project.

<sup>12</sup> For example, research, management, dissemination, etc.

<sup>13</sup> Indicate which ESR(s) will participate in the Work Package in question

**Table 1.2 a Recruitment Deliverables per Beneficiary**

Researcher No.	Recruiting Participant (short name)	Planned Start Month 0-45	Duration (months) 3-36

	Main Training Events & Conferences	ECTS (if any)	Lead Institution	Project Month (estimated)
1				
2				
3				
4				

### 1.3 Quality of the supervision

Required sub-headings:

- Qualifications and supervision experience of supervisors
- Quality of the joint supervision arrangements (mandatory for EID and EJD).

To avoid duplication, the role and profile of the supervisors should only be listed in the "Participating Organisations" tables (see section 4 below).

The following section of the European Charter for Researchers refers specifically to supervision:

#### **Supervision**

Employers and/or funders should ensure that a person is clearly identified to whom Early-Stage Researchers can refer for the performance of their professional duties, and should inform the researchers accordingly.

Such arrangements should clearly define that the proposed supervisors are sufficiently expert in supervising research, have the time, knowledge, experience, expertise and commitment to be able to offer the research trainee appropriate support and provide for the necessary progress and review procedures, as well as the necessary feedback mechanisms.

#### **1.4 *Quality of the proposed interaction between the participating organisations***

Required sub-headings:

- Contribution of all participants to the research and training programme
- Synergies between participants
- Exposure of recruited researchers to different (research) environments, and the complementarity thereof

## **2. Impact**

### **2.1 *Enhancing research- and innovation-related human resources, skills, and working conditions to realise the potential of individuals and to provide new career perspectives***

In this section, please explain the impact of the research and training on the fellows' careers.

### **2.2 *Contribution to structuring doctoral/early-stage research training at the European level and to strengthening European innovation capacity, including the potential for:***

- a) Contribution of the non-academic sector to the doctoral / research training (as appropriate to the implementation mode and research domain)
- b) Contribution to developing sustainable joint doctoral degree structures (for EJD mode only)

### **2.3 *Effectiveness of the proposed measures for communication and dissemination of results***

Required sub-headings:

- Communication and public engagement strategy of the project
- Dissemination of the research results
- Exploitation of results and intellectual property

Concrete plans for the above must be included in the corresponding implementation tables.

The following sections of the European Charter for Researchers refer specifically to public engagement and dissemination:

#### **Public Engagement**

Researchers should ensure that their research activities are made known to society at large in such a way that they can be understood by non-specialists, thereby improving the public's understanding of science. Direct engagement with the public will help researchers to better understand public interest in priorities for science and technology and also the public's concerns.

## Dissemination, Exploitation of Results

All researchers should ensure, in compliance with their contractual arrangements, that the results of their research are disseminated and exploited, e.g. communicated, transferred into other research settings or, if appropriate, commercialised. Senior researchers, in particular, are expected to take a lead in ensuring that research is fruitful and that results are either exploited commercially or made accessible to the public (or both) whenever the opportunity arises.

## 3. Implementation

### 3.1 Overall coherence and effectiveness of the work plan

Required **sub-headings**:

- Work Packages description (please include table 3.1a);
- List of major deliverables (please include table 3.1b), including the awarding of doctoral degrees, where applicable<sup>14</sup>;
- List of major milestones (please include table 3.1c)
- Fellow's individual projects, (please include table 3.1d);
- Gantt Chart, including secondment plan (please use template [below](#))<sup>15</sup>.

**Due date:** The schedule should indicate the **number of months** elapsed from the start of the project (Month 1).

**Table 3.1 a Description of Work Packages**

WP Number	Start Month – End Month
<b>WP Title</b>	<i>(e.g. including Research, Training, Management, Communication and Dissemination...)</i>
<b>Lead Beneficiary</b>	
<b>Objectives</b>	
<b>Description of Work and Role of Partners</b> <i>(possibly broken down into tasks), lead partner and role of participants</i>	
<b>Description of Deliverables</b> <i>(brief description and month of delivery)</i>	

**Table 3.1 b Deliverables List**

A **deliverable** is a distinct output of the project, meaningful in terms of the project's overall objectives and constituted by a report, a document, a technical diagram, a software, training, conference, etc.

<sup>14</sup> This could also be after the end of the project

<sup>15</sup> Note that although the Gantt Chart will be assessed under section 3, the chart itself does not count towards the page limit and should be included under section 4.

Deliverable Number <sup>16</sup>	Deliverable Title <sup>17</sup>	WP No.	Lead Beneficiary Short Name	Type <sup>18</sup>	Dissemination Level <sup>19</sup>	Due Date

**Table 3.1 c Milestones List**

**Milestones** are control points in the project that help to chart progress. Milestones may correspond to the completion of a key deliverable, allowing the next phase of the work to begin. They may also be needed at intermediary points so that, if problems have arisen, corrective measures can be taken. A milestone may be a critical decision point in the project where, for example, the consortium must decide which of several technologies to adopt for further development.

Number	Title	Related Work Package(s)	Lead Beneficiary	Due Date <sup>20</sup>	Means of Verification <sup>21</sup>

**Table 3.1 d Individual Research Projects**

If applicable and relevant, linkages between the individual research projects and the work packages should be summarised here (one table /fellow).

<sup>16</sup> Deliverable numbers in order of delivery dates. Please use the numbering convention <WP number>.<number of deliverable within that WP>. For example, deliverable 4.2 would be the second deliverable from Work Package 4.

<sup>17</sup> Including overall recruitment, Researcher Declarations on Conformity, Career development Plan, scientific/training deliverable x, etc.)

<sup>18</sup> Please indicate the nature of the deliverable using one of the following codes:  
**R** = Report; **ADM** = Administrative (website completion, recruitment completion, etc.); **PDE** = dissemination and/or exploitation of project results; **OTHER** = Other including coordination

<sup>19</sup> Please indicate the dissemination level using one of the following codes:  
**PU = Public:** fully open, e.g. web; **CO = Confidential:** restricted to consortium, other designated entities (as appropriate) and Commission services;  
**CI = Classified:** classified information as intended in Commission Decision 2001/844/EC.

<sup>20</sup> Measured in months from the project start date (month 1).

<sup>21</sup> Show how the consortium will confirm that the milestone has been attained. Refer to indicators if appropriate. For example: a laboratory prototype completed and running flawlessly; software released and validated by a user group; field survey complete and data quality validated.

Fellow (e.g. ESR1)	Host institution	PhD enrolment (Y/N)	Start date (e.g. Month 6)	Duration (e.g. 36 months)	Deliverables (refer to numbers in table 4.1b)
<b>Project Title and Work Package(s) to which it is related:</b>					
<b>Objectives:</b>					
<b>Expected Results:</b>					
<b>Planned secondment(s):</b> <i>Host, timing, length and purpose</i>					

**3.2 Appropriateness of the management structure and procedures,** including quality management and risk management (with a mandatory joint governing structure for EID and EJD projects)

Required sub-headings:

- Network organisation and management structure, including financial management strategy, strategy for dealing with scientific misconduct
- Joint governing structure (mandatory for EID and EJD projects)
- For EJD, joint admission, selection, supervision, monitoring and assessment procedures
- Supervisory board
- Recruitment strategy
- Progress monitoring and evaluation of individual projects
- Risk management at consortium level (including table 3.2a)
- Intellectual Property Rights (IPR)
- Gender aspects (both at the level of recruitment and that of decision-making within the project)

**Table 3.2a Implementation Risks**

Risk No.	Description of Risk	WP Number	Proposed mitigation measures
R1	e.g. Delay in recruitment	WP 1	

The following sections of the European Code of Conduct for the Recruitment of Researchers refer specifically to recruitment and selection:

**Recruitment**

Employers and/or funders should establish recruitment procedures which are open, efficient, transparent, supportive and internationally comparable, as well as tailored to the type of positions advertised.

Advertisements should give a broad description of knowledge and competencies required, and should not be so specialised as to discourage suitable applicants. Employers should include a description of the working conditions and entitlements, including career development prospects. Moreover, the time allowed between the advertisement of the vacancy or the call for applications and the deadline for reply should be realistic.

## **Selection**

Selection committees should bring together diverse expertise and competences and should have an adequate gender balance and, where appropriate and feasible, include members from different sectors (academic and non-academic, including enterprise) and disciplines, including from other countries and with relevant experience to assess the candidate. Whenever possible, a wide range of selection practices should be used, such as external expert assessment and face-to-face interviews. Members of selection panels should be adequately trained.

### **3.3 Appropriateness of the infrastructure of the participating organisations**

Explain the appropriateness of the infrastructure of each participant, as outlined in Section 5 (Participating Organisations), in light of the tasks allocated to them in the project.

### **3.4 Competences, experience and complementarity of the participating organisations and their commitment to the programme**

Required sub-headings:

- Consortium composition and exploitation of partners' complementarities: explain the compatibility and coherence between the tasks attributed to each beneficiary in the project, including in light of their experience;
- Commitment of beneficiaries and partner organisations to the programme (for partner organisations, please see also sections 4 and 6).

**i) Funding of non-associated Third countries (if applicable):** Only entities from EU Member States, from Horizon 2020 Associated Countries or from countries listed in Annex A of the Work Programme are automatically eligible for EU funding. If one or more of the beneficiaries requesting EU funding is based in a country that is not automatically eligible for such funding, the application shall explain in terms of the objectives of the project why such funding would be essential. Only in exceptional cases will these organisations receive EU funding.<sup>22</sup> The same applies for **international organisations** other than IEIO.

**ii) Partner organisations:** The role of partner organisations and their active contribution to the research and training activities should be described. A letter of commitment shall also be provided in Section 6 (included within the PDF file of part B, but outside the page limit).

---

**STOP PAGE COUNT – MAX 30 PAGES**

---

<sup>22</sup> Article 10 of the Rules for participation and dissemination in "Horizon 2020" (Regulation (EU) No. 1290/2013 of the European Parliament and of the Council of 11 December 2013).

## 4. Gantt Chart

*Reflecting ESR recruitments, secondments, training events, management and dissemination / public engagement activities*

**S = Secondment<sup>23</sup>**

**K = Kick-off meeting**

**E = End of project**

<sup>23</sup> **30% secondment rule:** Each recruited researcher can be seconded to other beneficiaries and /or to partner organisations for a duration of up to 30% of his/her recruitment period (above the “minimum” requirements of the EJD and EID modes).

## 5. Participating Organisations

All organisations (whether beneficiaries or partner organisations) must complete the appropriate table below. Complete one table of maximum one page per beneficiary and half a page per partner organisation (minimum font size: 9).

For **beneficiaries**:

<b>Beneficiary Legal Name</b>	
<b>General Description</b>	
<b>Role and Commitment of key persons (including supervisors)</b>	<i>Including names, title and the foreseen extent of involvement - in <u>percentage of full-time employment</u> - of the key scientific staff who will be involved in the research, training and supervision</i>
<b>Key Research Facilities, Infrastructure and Equipment</b>	<i>Demonstrate that each team has sufficient facilities and infrastructure to host and/or offer a suitable environment for supervising the research and training of the recruited Early-Stage Researchers</i>
<b>Independent Research premises</b>	<i>Please explain the status of the beneficiary's research facilities - i.e. are they owned by the beneficiary or rented by it? Are its research premises wholly independent from other beneficiaries and/or partner organisations in the consortium?</i>
<b>Previous Involvement in Research and Training Programmes</b>	<i>Detail any relevant EU, national or international research and training projects in which the partner has previously participated</i>
<b>Current Involvement in Research and Training Programmes</b>	<i>Detail any relevant EU, national or international research and training projects in which the partner is currently participating</i>
<b>Relevant Publications and/or Research / Innovation Product</b>	<i>Max. 5</i>

For **partner organisations**:

<b>Partner Organisation Legal Name</b>	
<b>General description</b>	
<b>Key Persons and Expertise</b>	
<b>Key Research Facilities, Infrastructure and Equipment</b>	
<b>Previous and Current Involvement in Research and Training Programmes</b>	
<b>Relevant Publications and/or Research / Innovation Product</b>	<i>Max. 3</i>

## 6. Ethics Issues

All research activities in Horizon 2020 must respect fundamental ethics principles, including those reflected in the Charter of Fundamental Rights of the European Union.<sup>24</sup> These principles include the need to ensure the freedom of research and the need to protect the physical and moral integrity of individuals and the welfare of animals.

Research ethics is of crucial importance for all scientific domains. Informed consent and confidentiality are as important for a sociological study as they are for clinical research.

All proposals considered for funding will be submitted to an Ethics Review. The Ethics Review is the core of the H2020 Ethics Appraisal scheme, which concerns all proposals and projects, and also includes the Ethics Checks and Ethics Audit that can be initiated during the project implementation.

In this context, please be aware that it is the applicants' responsibility to identify any potential ethical issues, to handle the ethical aspects of their proposal, and to detail how they plan to address them.

If any ethics issues have been entered in the ethical issues checklist in Part A of the proposal, then an ethics self-assessment must be included in this section. For more details, please refer to the "H2020 How to complete your Ethics Self-Assessment" guide.

The self-assessment in this section must:

**1) Describe how the proposal meets the national legal and ethics requirements of the country or countries where the tasks raising ethical issues are to be carried out.**

Should the proposal be selected for funding, applicants will be required to provide the following documents, if they are already in their possession:

- The ethics committee opinion required under national law
- The document that is mandatory under national law notifying activities raising ethics issues or authorising such activities

*If these documents are not in English, applicants must also submit an English summary of them (containing, if available, the conclusions of the committee or authority concerned).*

*If it is planned to request these documents specifically for the proposed project, the request must contain an explicit reference to its title.*

---

<sup>24</sup> Charter of Fundamental Rights of the European Union, 2000/C 364/01. See also: [http://www.europarl.europa.eu/charter/default\\_en.htm](http://www.europarl.europa.eu/charter/default_en.htm)

**2) Explain in detail in the ethics issues table how the consortium intends to address the issues, in particular as regards:**

- Research **objectives** (e.g. study of vulnerable populations, dual use, etc.)
- Research **methodology** (e.g. clinical trials, involvement of children and related consent procedures, protection of any data collected, etc.)
- The potential **impact** of the research (e.g. dual use issues, environmental damage, stigmatisation of particular social groups, political or financial retaliation, benefit-sharing, malevolent use, etc.).

## **7. Letters of Commitment**

Please use this section to insert scanned copies of the required **Letters of Commitment from partner organisations**.

**For EJD, Letters of Institutional Commitment** should also be included from those academic beneficiaries that will award the doctoral degrees. These letters should be signed by a legal representative of the organisation in question.
