

# How to write an "Impact" Section in proposals under The H2020 Framework Programme

## Module 5 : Practical Exercise

# Rules of the game...

- ❑ In groups of 5 maximum.
- ❑ Imagine you are about to write the Impact section of a project proposal responding to the call

Title: *Advanced materials solutions and architectures for high efficiency solar energy harvesting*

Scope: Proposals should develop novel durable materials solutions for novel high efficiency solar technologies, to enhance system conversion efficiencies, while preserving lifetime and ensuring materials resource efficiency.

Expected Impact:

- A deeper understanding of the material and interface characteristics and their long-term performance;
- The demonstration of device designs and fabrication processes for high efficiency technologies.

(Alternatively existing projects in preparation can be used)

# Rules of the game...

- ❑ You have 1 h to:
- ✓ Think about of a consortium with 5 partners
- ✓ Elaborate the magic tables

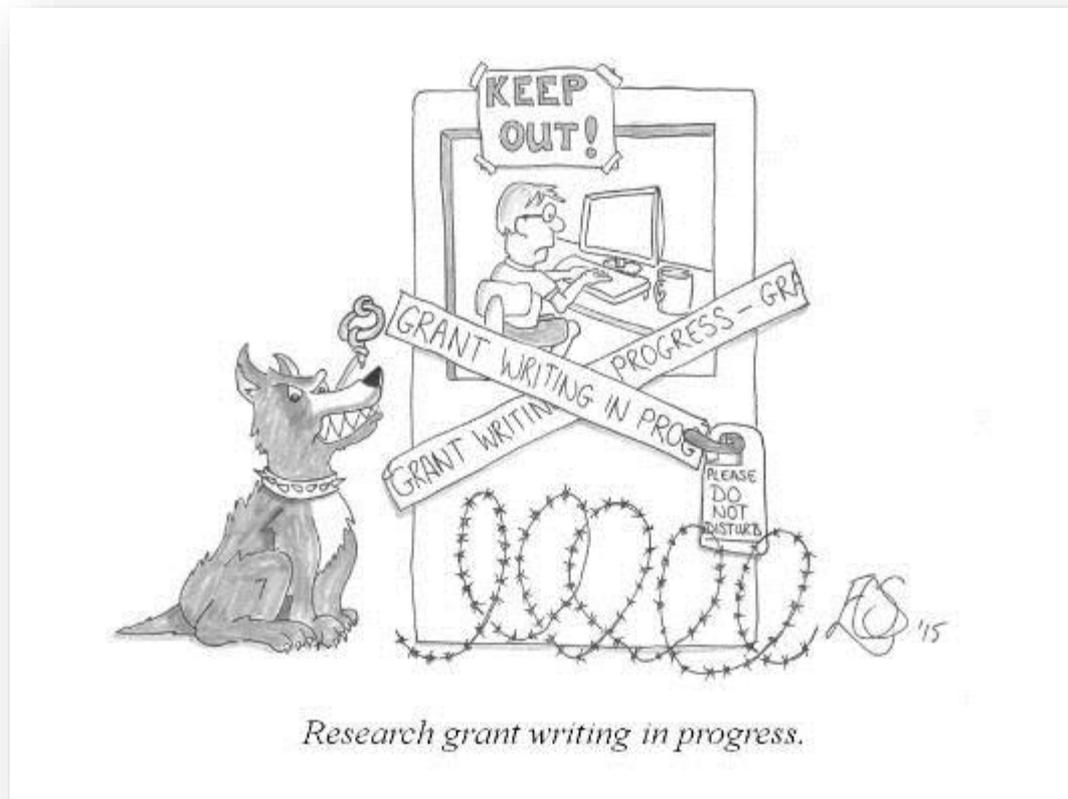

Project Concrete Expected Impact Item	Concrete ways in which the deliverable is going to be disseminated	Corresponding Work Package and deliverable and timing foreseen	Concrete audience targeted
---	--	---	-------------------------------

Project Concrete Expected Impact Item	Corresponding deliverable and Work Package	Partner(s) that will benefit	Concrete ways in which the benefit will materialise
---	--	---------------------------------	--

- ✓ Think about max. 5 impact items;
- ❑ After 1 h nominate a group presenter and present your tables in 10 min. for discussion with “evaluators” (rest of the audience).

# Thanks for your attention questions...

*Research grant writing in progress.*
